

## OPERATION ALYSHA

Many patients like Alysha are currently fighting Leukemia and are in immediate need for a stem cell transplant.

### *Here's How You Can Help Now:*

#### **1. Donate Blood**

Blood and blood product transfusions are a critical part of cancer treatment and cannot happen without the selfless dedication of people like you. All we need is an hour of your time to donate blood at your local blood donor clinic.

**Call 1 888 2 DONATE or visit [blood.ca](http://blood.ca) to find a clinic near you today.**

#### **2. Join OneMatch Stem Cell and Marrow Network**

Many patients in Canada and around the world will need an unrelated stem cell transplant to survive. Unrelated means patients fighting Leukemia will have to find a person to donate their stem cells that are not part of their immediate family. That means you or someone you know may be the one. If you are over 17 and less than 51 years old, and in good health, please go to [www.onematch.ca](http://www.onematch.ca) and follow the user-friendly steps on how you can get registered.

**Donate blood and Join OneMatch Today so Patients Like Alysha Have The Best Chance of Finding a Match.**
